Midland-Bay-Huron-Saginaw-Tuscola-Sanilac-Shiawassee-Genesee-Lapeer-
St. Clair-Livingston-Oakland-Macomb-
439 AM EDT Thu Jun 15 2023

This hazardous weather outlook is for portions of southeast Michigan.

.DAY ONE...Today and Tonight

Isolated to scattered thunderstorms will be possible this morning as elevated activity tracks southeastward across the area.

Isolated to scattered thunderstorms are possible again this afternoon and evening. Though severe weather is not expected across this area, some storms may become strong with the greatest threat being damaging winds to 50 mph with some hail up to a half inch in diameter possible. Storm mode for any afternoon development would be discrete to multicell clusters with storm motion to the southeast at 40 mph.

.DAYS TWO THROUGH SEVEN...Friday through Wednesday

No hazardous weather is expected at this time.

.SPOTTER INFORMATION STATEMENT...

Spotter activation will not be needed today and tonight.
